

M922/M922A1

American Ordnance LLC, operator of the Iowa and Milan Army Ammunition Plants, produces the Cartridge 40mm Dummy ammunition for the U.S. Army, Marines and other State Department approved customers.

USE: This cartridge is used as a drill round to train users in handling ammunition and loading the Mk19 series automatic grenade launcher.

DESCRIPTION: The cartridge is completely inert and simulates a loaded round of 40MM HE ammunition in size, shape and weight. This fixed round consists of a one-piece solid aluminum projectile body together with a copper rotating band. The cartridge case is crimped around the projectile body. There are four thru-holes drilled through the cartridge case to the high-pressure chamber for positive identification. The primer hole is filled with RTV sealant. The M922A1 is functionally similar except it is made of one piece of aluminum.

SPECIFICATIONS:

Length: 4.42 in
Weight: .76 lbs
Explosive Filler: None
Fuze: None

40mm Cartridge
M922 Dummy
