

Hawk Missile (Warhead)

American Ordnance LLC, operator of the Iowa and Milan Army Ammunition Plants, can produce the HAWK warhead projectile for State Department approved customers.

USE: Provides Surface-to-Air missile defense of assigned areas of operation or installations against low and medium air attack elements.

DESCRIPTION: The HAWK is an all-weather, supersonic air defense missile system designed to destroy low - to medium-altitude high performance and rotary-wing aircraft. The HAWK missile is effective against the full spectrum of attacking aircraft at tactical speeds in benign and electronic countermeasure environments. HAWK is mobile and employment of the system is flexible so as to cover various contingencies. The system provides 360-degree coverage of a defended asset and can acquire targets out to 80km.

SPECIFICATIONS:

Range: 14.9 miles

Warhead: 300 lbs
